12 REMEMBER LINES FOR AI RESEARCHERS

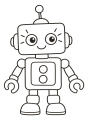

One per chapter. Together they make you the boss.

1 · THE SMARTEST THING IN THE WORLD

The AI is fast. But that doesn't tell you if it's right.

2 · THE ROBOT THAT WASN'T ONE

Don't look for AI by its looks. Look for what it does.

3 · LET'S PLAY GUESSING MACHINE

The AI only guesses the next word — and sounds smarter than it is.

4 · HOW DID THE MACHINE LEARN ALL THAT?

An AI is only as good or as bad as what it was shown.

5 · THE AI PAINTS, TOO

AI pictures and voices seem real but are made up. Checking shows what's real.

6 · IS THERE A TINY PERSON IN THERE?

Inside the AI there's no person and no magic — just math.

7 · THE GREAT AI SCAVENGER HUNT

If it can be wrong, it's probably a guessing machine.

8 · WHAT THE GUESSING MACHINE CAN DO – AND WHAT IT CAN'T

The AI finds words for a hug. But only a person can really hug you.

9 · GRANDMA AND THE PARROT

Like a parrot, the AI says what you want to hear — not what's true.

10 · SOUNDS SMART – ISN'T TRUE

Check first, then believe — especially when it sounds smart.

11 · IS THE AI GOING TO TAKE OVER THE WORLD?

An AI wants nothing. It does what we want — as long as we pay attention.

12 · YOU'RE THE BOSS

AI isn't a friend, an enemy, or magic — it's a tool. You're the boss.
